

TSGP Conference Call Summary
February 2, 2011
1:00PM EST

Opening Comments:

TSA: Hello, everyone. Thank you for calling in. This is our monthly conference call.

We have just a short update today, which will be similar information for those who called in last month. At this time we are still under a Continuing Resolution (CR), which is in effect until March 4, 2011. As stated in our last monthly call this means that FY11 Transit Security Grant Program (TSGP) will remain in a pending status until March 4th or until an Appropriations Bill is passed. If we receive any additional information prior to this date we will contact you via email.

We would now like to open up the line for any questions.

Questions and Answers:

Q1: What is the status of the proposed framework that was discussed last fall? Has there been any movement in regards to a decision?

A: At this time the proposed framework has not been finalized and options have been submitted to the Secretary for her consideration and final decision. The options proposed take into account the feedback received, particularly the conceptual structure of the RTSWGs, the Tier I and Tier II structure, and funding for critical infrastructure transit assets.

Closing Comments:

Thank you for calling in and thank you for your questions.

If there is a change respective to the Appropriations Bill, we will update you through email and return to weekly calls. Until then we will continue to be on a monthly call status, the next call will be in one month on Wednesday, March 2, 2011 at 1:00PM EST. As this is just before the CR is scheduled to expire, we may have more information on the program status based on Congressional action by that time. The call in number is 888-323-4702 and the passcode is Wednesday. Any changes to the conference call schedule will be sent out through ASKCSID@dhs.gov and TSAGrants@tsa.dhs.gov.

If you do have any questions, you may submit them via an email to ASKCSID (ASKCSID@dhs.gov) and carbon copy TSA Grants (TSAGrants@tsa.dhs.gov).

Thank you.
This concludes the call.
