

New International Inbound Screening Requirement

Effective May 1, TSA has increased the percentages of cargo that must be screened prior to being loaded onto a passenger aircraft inbound to for the U.S. These changes, while not yet requiring 100% levels, are part of the Congressional mandates required under the 9/11 Act. The screening percentages are Sensitive Security Information (SSI), however, the changes apply to all U.S. and foreign flag airlines operating into the U.S.
