

Recommendations

Harnessing the collective power of the community

Recommendations has been designed to help users get to the content they need faster by leveraging the recommendations of peers and the overall community.

Recommending Titles

The Recommendations feature uses a simple Yes/No voting system. Clicking on Yes or No will cast your vote, and clicking on Change will cancel it.

The votes are anonymously tallied to determine the "Recommended" titles.

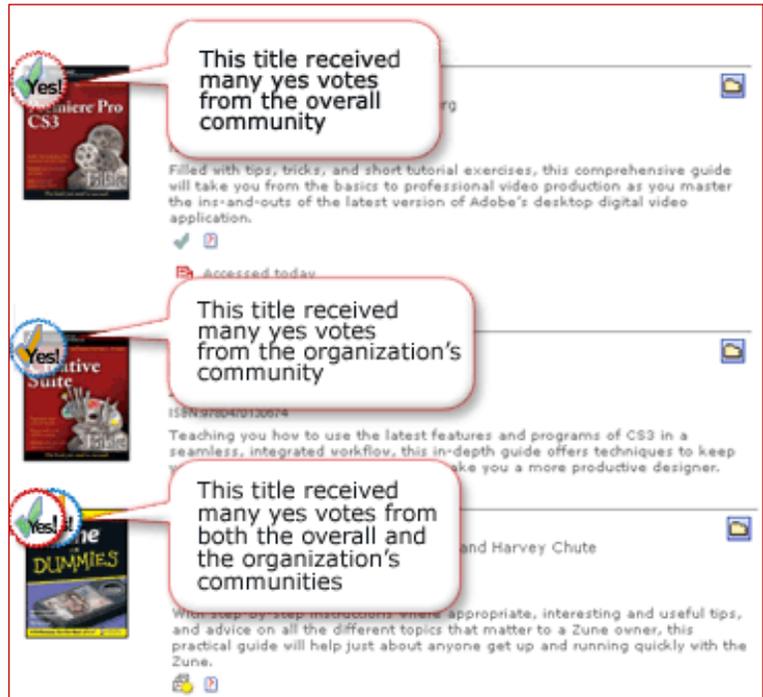

Finding Recommended Titles

Personal, subscription-level (optional) and overall Recommended titles are displayed with special graphics wherever they appear on the site.

Personal recommendation votes are displayed in the meta-icon area of the title, so your votes are easily identified wherever they appear on the site.

All the titles you have recommended are listed in the Recommended System Folder on the My Home page, along with the most Recommended titles across Books24x7.

Filter Options

Filter Options display on all title lists including My Home Folders, Browse Topics and Search results. Filter to only display titles with certain characteristics, like only Recommended titles or those with PDF downloads. Note - using the Filter Options in search results maintains relevancy ranking.
