Rosetta Stone has developed an internet-based language training program using its Dynamic Immersion method to reinforce your natural language-learning skills in learning languages.

- Remember you learned your first language without translation and you learned it easily and naturally by connecting words to objects and events around you.
- You can now learn a new language with Rosetta Stone the same way: using native speakers and thousands of real-life images to help you think in the new language from the very beginning.

How Rosetta Stone language training can help you;

- Understand everyday language through Rosetta Stone’s proficiency-based listening and reading activities.
- Pronounce words correctly after practicing with Rosetta Stone’s speech comparison tool.
- Find the words you need when you need them. Connecting new language directly to real-life images means the words spring to mind when you’re in everyday contexts.
- Spell and write accurately. Language-specific keyboards and drag-and-drop tiles perfect your writing skills.
- Learn to communicate quickly, by combining words and phrases into complete sentences and dialogues.
- Retain what you learn. Regular reinforcement of new words and phrases in new contexts makes sure the language sticks with you in the real world.
