

U.S. Department of Homeland Security Transportation Security Administration Sensitive Security Information Program Presents:

SSI Training for Pipelines Stakeholders

As of May 2022

SENSITIVE SECURITY INFORMATION BRIEFING

SS

Objectives

This briefing will focus on the following topics:

- The differences between Classified National Security Information and Sensitive Security Information (SSI)
- Which portions of the SSI Federal Regulation apply to Pipelines
- The proper means of marking and protecting SSI

Brief History of SSI

- SSI was developed pre-9/11
- Created in response to hijackings in the early 1970s

The Air Transportation Security Act of 1974:

- Required the Federal Aviation Administration (FAA) to establish a regulation for sharing sensitive information with airlines and airports
- The FAA published the first SSI regulation in the Federal Register in 1976

After 9/11, SSI applies to all modes of transportation.

Where SSI Fits

All information held by the Federal government falls into two categories:

 Classified National Security Information (Confidential, Secret, Top Secret)

or

• Unclassified

(SSI, For Official Use Only (FOUO), Public Information, etc.)

Classified Information

CONFIDENTIAL	
THIS IS A CONER SHEET FOR CLASSING INFORMATION	
RLL-MONDULLA INVELIDO THE INFORMATION AN REQUEST TO PROFESS In Requirement interest to the system in the instance of the building interest of the system of the system of the system of the building interest of the system of the system of the system of the system building of the system of the system of the system of the system building of the system of the system of the system of the system building of the system of the system of the system of the system of the system of the system of the system of the system of the system of the system of the system of the system of the system of the	
interior, energia, no salere seudences tessuriose.	
CONFIDENTIAL •	

Information whose "unauthorized disclosure could reasonably be expected to cause identifiable or describable damage to the national security"*

Example: A U.S. Special Operations team conducts a raid, driven by intelligence, overseas. The *identity* of the "source" of data and the *information* he or she provided would both be classified.

* Source: Executive Order 13526, Dec. 2009

Unclassified Information Falls into Two Categories

• Sensitive But Unclassified (SBU)

A broad category that includes a Federally regulated means of protecting information such as SSI and unregulated means of protecting information such as FOUO

• **Public Information** All other information

Sensitive Security Information

Information obtained or developed which, if released publicly, would be <u>detrimental</u> to <u>transportation</u> security.

Examples:

- Pipeline Company's Security Plan
- TSA Security Directives marked as SSI issued to Pipeline Industry
- Requests for Alternate Measures to TSA's Security Directives and TSA's responses to such requests

For Official Use Only (FOUO)

Information not protected by regulation that could adversely affect a Federal program if publicly released without authorization.

Example:

Federal building security plans

* Source: DHS Management Directive 11042.1

SENSITIVE SECURITY INFORMATION BRIEFING

What are the differences?

FOUO and SSI are categories of Sensitive But Unclassified information, but:

- SSI is based on U.S. law and protected by a Federal regulation; FOUO is not
- SSI protects information related to transportation security; FOUO has no subject matter limitations
- Unauthorized SSI disclosure may result in a civil penalty; FOUO breaches cannot

What Are the Differences? (cont.)

- In litigation, SSI has stronger protection from court-ordered production requests while documents marked only as FOUO have little or no protection
- SSI is protected from public release under a Freedom of Information Act (FOIA) request; FOUO may be either protected or released under FOIA

Documents that contain SSI must be marked as SSI – not as FOUO. When information is pulled from reports marked FOUO and SSI, the new report must be marked as SSI – Not FOUO/SSI

Focus on the **SSI** Federal Regulation (49 CFR Part 1520)

Department of Homeland Security Transportation Security Administration 49 CFR 1520 - The SSI Federal Regulation spared by the TSA SSI Office, incorporating the following: Volume 62 of the Federal Register at page 2005 (cited as 69 FR 20052), May 18, 2004 as ammended January 7, 2005 at 70 FR 1352, July 10, 2005 at 70 FR 41509, May 20, 2005 at 71 FR 33507, November 20, 2005 at 73 FR 2172, Sectember 16, 2009 at 74 FR 7456, August 18, 2011 at 76 FR 518107, and March 23, 2003 at 55 FR 10456, ellective Externine 21, 2003

Authority: 46 U.S.C. 70102-70106. 70117; 49 U.S.C. 114. 40113 44901_44907 44913_44914 44916_44918 44935 44936, 44942, 46105.

§ 1520 [Amendment Summary]

In § 1520.3, removed the definitions of "DHS, 'DOT', 'Rail facility', 'Rail harardose materiale receiver', 'Rail harardose materiale sloper.' Rail transt facility', 'Rail transf spreader or Rail Flood Guideway Spstem', 'Railwood', 'Record', and 'Vulnerability assessment' as they are located in § 1200.3.

In § 1820.5, revised paragraphs (b)(1), (b)(6000, (b)(9) introductory text, (b)(10), (b)(12) introductory text, and (b)(15) to include surface. In § 1820.7, clarified that maritime and surface operators are "covered".

§ 1520.1 Scope

(a) Applicability: This part governs the maintenance, safeguarding, and disclosure of records and information that TSA has determined to be Sensitive Security Information, as defined in § 1520.5. This part does not apply to the maintenance, safeguarding, or disclosure of classified national security information, as defined by Executive Order 12968, or to other sensitive unclassified information that is not SSI, but that nonetheless may be exempt from public disclosure under the Freedom of Information Act. In addition in the case of information that has been designated as critic infrastructure information under section 214 of the Homeland Security Act, the receipt, maintenance, or disclosure of such information by a Federal agency or employee is governed by section 214 and any implementing regulations, not by this part.

(b) Delegation. The authority of TSA and the Coast Guard under this part may be further delegated within TSA and Coast Guard, respectively.

§ 1520.3 Terms used in this part.

In addition to the terms in § 1500.3 of this chapter, the following terms apply in this part: Administrator means the Under Secretary of Transportation for Security referred to in 49 U.S.C. 114(b), o his or her designee. Coast Guard means the United States Coast Guard.

Covered person means any organization, entity, individual, or other person described in § 1520.7. In the cas of an individual, covered person includes any individual applying for employment in a position that would be a covered person, or in training for such a position, regardless of whether that individual is receiving a wage, salary, or other form of payment. Covered person includes a person

Security contingency plan means a plan detailing response sectority uniquely pur matters a part occurry incident, threat sessment, or specific threat against transportation, including datalis of proparation, response, mitigation, recovery, and reconstitution procedures, continuity of government, continuity of transportation operations, and crisis management. Security screening means evaluating a person or property etermine whether either poses a threat to security.

SSI means sensitive security information, as described in \$ 1520.5.

Treat image projection system means an evaluation tool that involves periodic presentation of fictional threat to operators and is used in connection with x-ray or nal threat images explosives detection systems equipment. 7SA means the Transportation Security Administration

§ 1520.5 Sensitive security information.

(a) In general. In accordance with 49 U.S.C. 114(s), SSI is information obtained or developed in the conduct of security activities, including research and development, the disclosure of which TSA has determined would-Constitute an unwarranted invasion of privacy (including, but not limited to, information contained in any

personnel, medical, or similar file); (2) Reveal trade secrets or privileged or confidential

information obtained from any person; or (3) Be detrimental to the security of transportation.

Information constituting SSI. Except as otherwise ided in writing by TSA in the interest of public safety or in furtherance of transportation security, the following information, and records containing such information constitute SSI:

1) Security progr

Any security program, security plan, or security contingency plan issued, established, required, received, or approved by DOT or DHS, including any comments, instructions, or implementing guidance, including -

instructions, or implementing guidance, including — (i) Any aircraft operator, aircort operator, fixed base operator, or air cargo security program, or security contingency plan under this chapter: (ii) Any vessel, maritime facility, or port area security plan required or directed under Federal law:

(iii) Any national or area security plan prepared under (iii) Any national or area security plan prepared the 46 U.S.C. 70103;
 (iv) Any security incident response plan established

under 46 U.S.C. 70104, and

(v) Any security program or plan required under subchapter D of this title.

Directives, Any Security Directive or order

SENSITIVE SECURITY INFORMATION BRIEFING

Sensitive Security Information

Another way of thinking about SSI is would this information assist an adversary who is planning an attack against a transportation system?

- How *useful* would the information be to an adversary?
- How *detailed* is it?
- Has DHS *officially released* it in the past?
- Is it *obvious*?
- Is it still *current*?

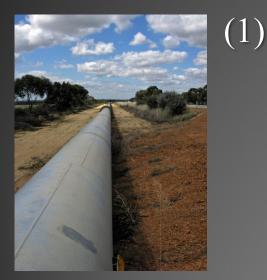

Sensitive Security Information

In order for information to be SSI, the information must be related to <u>transportation security</u>, its release must be <u>detrimental</u>, and it must fall under the one of the <u>16 categories of SSI</u> defined by the Federal Regulation (49 CFR Part 1520.5(b)).

This training will discuss only the relevant categories related to Pipelines.

16 SSI Categories

<u>Security Programs, security plans,</u> <u>and contingency plans</u> – Any security plan or security contingency plan issued, established, required, received or approved by DHS or DOT...

Examples of records protected under this category:

- Security plan for pipeline facilities
- Cybersecurity plans for pipeline systems

(2) <u>Security Directives</u> – Any Security Directive or order issued by TSA

Examples of records protected under this category:

TSA recently issued several Security Directives (SDs) to the Pipeline industry:

- Some of the SDs were marked as SSI and some were not; this was deliberate
- Any requests from industry for an alternate measure to these SDs
- Any responses from TSA to industry that discuss the denial or approval of an alternate measure

(5) <u>Vulnerability Assessments</u> – Any vulnerability assessments directed, created, held, funded or approved by DHS/DOT for any mode of transportation

Examples of records protected under this category:

- Vulnerability assessment created by Pipelines and shared with TSA
- Identified system vulnerabilities such as those identified during tests or evaluations

- (6) <u>Security Inspection or Investigative Information</u> Reports of inspections or investigations that could reveal a security vulnerability
- (7) <u>Threat Information</u> Information held by the government concerning threats to <u>any</u> mode of transportation, including cyber

- (8) <u>Security measures</u> Specific details of transportation security measures including:
 - (i) Security measures or protocols recommended by the Federal government

Note: Can include system cybersecurity measures

- (10) <u>Security Training Materials</u> Records created or obtained for purposes of training personnel
- (12) <u>Critical Transportation Infrastructure Assets</u> Lists of systems or assets, physical or virtual, vital to transportation *Note: Covers lists of critical pipelines or facilities*

(15) <u>Research and Development</u> – Research results that were approved, accepted, funded, recommended or directed by DHS/DOT

(16) <u>Other Information</u> – The TSA Administrator (or their designee) can determine information to be SSI that is not otherwise defined in 1520.5(b)(1)–(15) (rarely used)

Common Information Related to Pipelines that is SSI*

- Pipeline Companies Security Programs
- Vulnerability Assessments of systems or facilities
- TSA Security Directives (SDs) marked as SSI
- Requests from Industry for an Alternate Measures (AM) due to an SD
- TSA responses to AM requests sent to Industry
- TSA Intelligence Products marked as SSI

SENSITIVE SECURITY INFORMATION BRIEFING

What information is NOT SSI

- Safety information is not SSI
- Fire Evacuation Plans are not SSI
- Construction plans are not SSI
- Training materials for employees on safety measures are not SSI
- Safety inspections of infrastructure are not SSI

Covered Persons

According to the SSI Federal Regulation, <u>covered</u> <u>persons</u> may access SSI. This includes airport and airline officials, maritime operators, rail and pipeline operators, Federal employees, among others.

Persons with a "Need To Know"

Covered persons have a "need to know" SSI if access to information is necessary for the performance of, training for, or managing of personnel's official duties. DHS or DOT may limit access to specific SSI to certain employees or covered persons.

Example:

A pipeline operator does NOT need access to the TSA screening procedures conducted at airports.

Requests from the Media for SSI

Under the SSI Federal Regulation, members of the news media are not covered persons and do not have a "need to know" SSI.

SENSITIVE SECURITY INFORMATION BRIEFING

SSI Federal Regulation Outlines Procedures for Marking and Handling SSI

Department of Homeland Security Legartment of HomeFard Administration Transportation Security Administration 49 CFR 1520 – The SSI Regulation Peparet by the TSA 550 Office, nonportange the Montenny Visition 60 for Hereina Robert a dapa 2002 (side as 60 FR 2002), May 10, 2004 as amended on January 7, 2005 at 70 FR 1920, July 10, 2006 at 70 FR 41509, May 9, 2008 at 71 FR 3007, and Newter 20, 2008 at 79 FR 1920, which Societta 42, 2008.

S

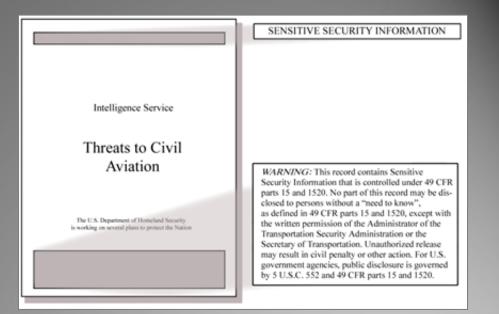

SENSITI SECURITY INFORM **ON** VE BRIEFING

explosives detection systems equipment. TSA means the Transportation Security Administration. Vulnerability assessment means any review, audit, or other examination of the security of a transportation infrastructure asset; airport; maritime facility, port area, or useals aircraft railmad, arginer rail facility resize.

Regulatory Requirement SSI – Protective Marking

Each page of the SSI record <u>must</u> include an SSI header and footer.

Even if there is only one sentence containing SSI in a 50-page document, every page must have an SSI header and footer.

SSI Footer

The SSI footer informs the viewer that the record must be protected from unauthorized disclosure.

No modification of the SSI Footer is authorized.

"WARNING: This record contains Sensitive Security Information that is controlled under 49 CFR parts 15 and 1520. No part of this record may be disclosed to persons without a "need to know," as defined in 49 CFR parts 15 and 1520, except with the written permission of the Administrator of the Transportation Security Administration or the Secretary of Transportation. Unauthorized release may result in civil penalty or other action. For U.S. government agencies, public disclosure is governed by 5 U.S.C. 552 and 49 CFR parts 15 and 1520."

Who Can Mark Records as SSI?

Stakeholders are permitted to mark information as SSI as long as they believe the record meets specific criteria under the SSI Federal Regulation:

- It is related to transportation security (not safety);
- Its release would be detrimental to transportation security (i.e., an adversary could use the information to plan an attack against the transportation system); and
- It falls under one of the 16 SSI Categories that are listed in the slides above.

Who Can Mark Records as SSI? (cont.)

It is important to remember that SSI is information which should be marked and protected in all forms of communication. This includes emails, Word documents, presentations, training, etc.

Storing SSI: Lock it Up!!!!

When not actually working with an SSI record (lunch break, end of the day, etc.), store the SSI record in a locked desk drawer or in a locked room to prevent unauthorized access by persons who do not have a "need to know."

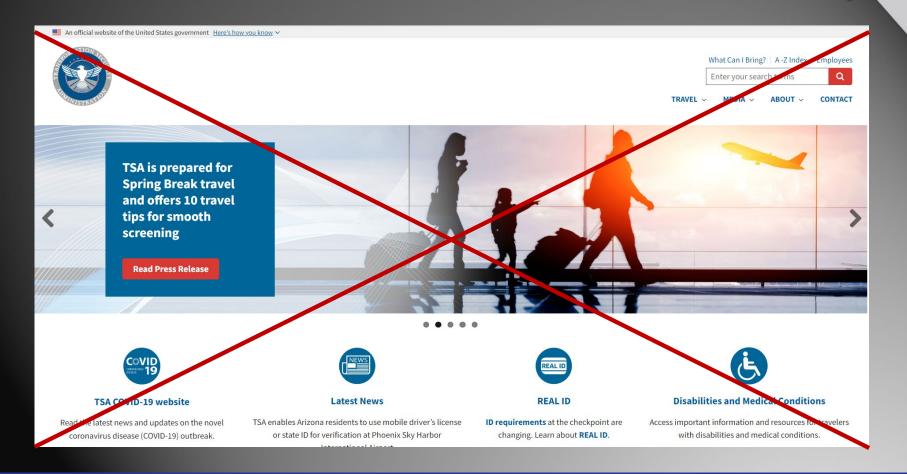

ALL RECIPIENTS OF SSI ARE MANDATED TO LOCK IT UP!!!

Protecting Electronic Data

- The SSI Regulation instructs: *"Take reasonable steps to safeguard SSI in that person's possession or control from unauthorized disclosure."*
- Safeguarding methods may include:
 - logging off from or locking unattended computers,
 - applying encryption, and/or
 - physically restricting access to electronic devices such as USB flash drives or other portable devices.

* 49 CFR §1520.9(a)(1)

Posting SSI: Never Post SSI on the Internet

SENSITIVE SECURITY INFORMATION BRIEFING

SSI

Duty to Report Unauthorized Disclosure of SSI

The SSI Federal Regulation states "when a covered person becomes aware that SSI has been released to unauthorized persons, the covered person must promptly inform TSA..." *

- This usually involves lost paper copies of SSI or SSI available on the Internet.
- Stakeholders may contact their TSA point of contact or the TSA SSI Program office at SSI@tsa.dhs.gov.

* 49 CFR §1520.9(c)

Destruction of SSI

"A covered person must destroy SSI completely to preclude recognition or reconstruction of the information when the covered person no longer needs the SSI to carry out transportation security measures."*

In other words, throwing SSI in a garbage can or recycling bin violates the SSI Federal Regulation.

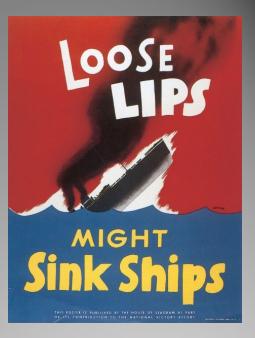

* 49 CFR § 1520.19(b)(1)

Discussing SSI in Public Areas is Inappropriate

Personnel must be very careful when discussing SSI in public areas.

You never know who is listening and not everyone has a "need to know" the information.

Remember: Adversaries do not care how they receive SSI as long as they get the information they need to plan an attack.

Consequences of Unauthorized Disclosure of SSI

- Lost money TSA can impose a civil penalty with amounts into the tens of thousands of dollars per offense against covered persons and companies
- <u>Lost jobs</u> for Federal employees, appropriate personnel action up to termination
- <u>Lost contract</u> TSA can decide whether to end a contract with a Federal vendor whose employees did not properly protect the SSI entrusted to their care

"Best Practices" for Non-DHS Employees to Protect SSI

SENSITIVE SECURITY INFORMATION TRAINING

SSI

Best Practices for Non-DHS Personnel

DHS stakeholders (i.e., regulated entities) and other covered parties are mandated under the SSI regulation to take "reasonable steps" to prevent unauthorized disclosure of SSI.

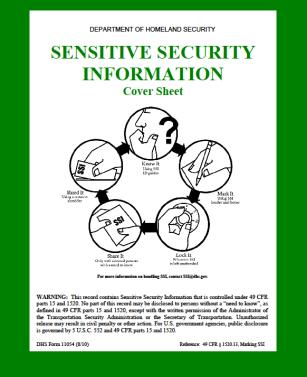

The next set of slides describes "Best Practices" that stakeholders may use in handling and protecting SSI.

These "Best Practices" are based on policies and procedures developed for DHS personnel to protect SSI.

Best Practices – SSI Cover Sheet

The SSI Cover sheet is NOT required by the SSI Federal Regulation but it is recommended to place everyone on notice they are dealing with SSI and can be added as needed.

Best Practices – Sharing SSI in E-mail

SSI information transmitted by e-mail should be *encrypted* or sent in a separate password-protected record and <u>not</u> in the body of an e-mail. Passwords should be sent separately, and should:

- Have eight-character minimum length
- Have at least one upper-case and one lower-case letter
- Contain at least one number
- Contain at least one symbol (e.g., *#\$%?!)
- Not be a word in the dictionary or a portion of the file name

Best Practices – Managing Sensitive Data in Webinars

Taking the following steps will help minimize the risk of unauthorized disclosure of SSI.

- Verify that all attendees of the meeting are covered persons with a "need to know" the SSI to be presented
- Manage policies to ensure only members from your organization or desired group can attend
- Enable "waiting room" features to see and vet attendees before granting them access
- ✓ Lock the event once all intended attendees have joined

Best Practices – Managing Sensitive Data in Webinars (cont.)

- Ensure that you (the host) can manually admit and remove attendees
- ✓ Be mindful of how (and to whom) you disseminate invitation links
- Consider sensitivity of data before exposing it via screen share or uploading it during video conferences
- ✓ Do not discuss information that you would not discuss over regular telephone lines

Best Practices - No SSI on Personally Owned Electronic Devices

SSI should not be stored, sent to, or printed to personal devices including home, public, or personal:

- Computers or tablets
- Fax machines
- Printer or copy machines
- Smart phones
- Thumb drives, external drives, or disks
- Email accounts

SENSITIVE SECURITY INFORMATION TRAINING

Best Practices – Closing the Gaps

- Change default password to strong, complex passwords for your router and Wi-Fi network
- ✓ At a minimum, ensure your router is configured to use WPA2 or WPA3 wireless encryption
- ✓ Avoid using public hotspots and networks
- Only use secure video conferencing tools approved by your organization
- ✓ Use official company email when sending SSI
- Ensure that any virtual assistants (e.g., Alexa) will not pick up your conversations

Best Practices – Closing the Gaps (cont.)

Remember, while conducting business, be conscious of your surroundings:

- Do not work in locations where your computer screen may be visible to others
- Take measures to prevent eavesdropping, especially when discussing SSI

Best Practices -Traveling with SSI

- Laptops containing SSI should be kept with you to the maximum extent possible
- Avoid transporting laptops containing SSI in checked baggage
- Laptops containing SSI and any SSI paperwork should be kept locked and out of sight (e.g., trunk) when unattended in vehicles
- In hotel rooms, use room safes for laptops containing SSI and any SSI paperwork

Best Practices – Destruction of SSI

The most common methods used to destroy SSI material include:

- Cross-cut shredders
- Contract with a shredding company
- Any method approved for the destruction of classified national security information

Frequently-Asked Questions

SENSITIVE SECURITY INFORMATION TRAINING

SS

Q: How Do We Handle Requests for SSI Information?

A: Requests for SSI fall into two categories:

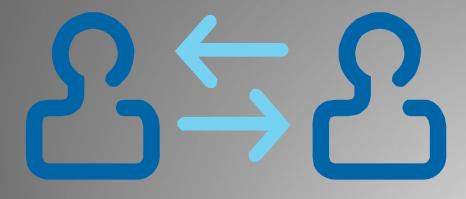

- Sharing SSI
- Releasing SSI

SST

Sharing SSI

To share SSI is to provide a record that contains SSI to another covered person. The record is marked as SSI and remains SSI.

The covered person with a "need to know" is now obligated by the SSI Federal Regulation to protect the SSI record entrusted to their care.

Releasing Records

Prior to releasing records containing SSI to persons who are not authorized to access SSI under the SSI Federal Regulation, the SSI language must be removed/redacted by the TSA SSI Program office. The redacted record may be released to the general public.

The redacted record should have the SSI header and SSI footer removed or crossed out.

SSI Redactions

- SSI Records that are produced due to Freedom of Information Act (FOIA) requests, courtorder production requests, or other requests are reviewed by the TSA SSI Program office.
- TSA then produces a redacted copy of the record with all of the SSI removed.

SCOPE AND APPLICABILITY

This Sensitive Security Information (SSI) Identification Guide provides guidance for which information is and is not SSI under 49 CFR 1520 (Title 49 part 1520 of the Code of Federal Regulations), related to the National Explosives Detection Canine Team Program. Users of this guide include the following: Transportation Security Administration (TSA) employees, contractors, and grantees; other Department of

agencies that use information covered in this guide; and, any other covered persons (as defined in 49 CFR 1520.7) that use or access information covered in this guide.

GENERAL INFORMATION ON THE NATIONAL EXPLOSIVES DETECTION CANINE TEAM PROGRAM (NEDCTP)

The National Explosives Detection Canine Team Program exists to deter and detect the introduction of explosives devices into the transportation system. In addition, bomb threats cause disruption of air, land and sea commerce and pose an unacceptable danger to the traveling public and should be resolved quickly.

component in a balanced counter-sabotage program. The use of highly trained explosives detection canine teams is also a proven deterrent to terrorism directed towarde transportation sustems and provides a timely and mobile response to support.

Q: How Do We Get SSI Redacted before a Record is Released?

- The SSI Federal Regulation states that
 - "Except as otherwise provided in this section... records containing SSI are not available for public inspection or copying, nor does TSA... release such records to persons without a "need to know." *
 - "(I)f a record contains both SSI and information that is not SSI, TSA...may disclose the record with the SSI redacted..." *
- TSA addresses these requirements by providing an official SSI Review process through its SSI Program office.
 * 49 CFR § § 1520.15(a) and 1520.15(b)

SENSITIVE SECURITY INFORMATION TRAINING

Processing Record Requests

- Similar to Federal Freedom of Information Act (FOIA), many state and local laws (e.g., "Sunshine" laws) provide citizens the right to access government records.
- While laws providing exemptions vary by state, 49 CFR § 1520.9(a)(3) requires that covered persons "Refer requests by other persons for SSI to TSA."
- This requirement for referral includes requests for access to SSI made under State, local, tribal or territorial public information and related laws.
- SSI falls under the SSI Federal Regulation, which preempts conflicting State, local, tribal and territorial law.

Processing Record Requests (cont.)

- Requests for TSA's own records made through State Open Records requests must be referred to TSA FOIA (FOIA@tsa.dhs.gov).
- Requests for records belonging to the state or airport authority should be submitted for full SSI Review to the SSI Program office.
- While the SSI Program office will attempt to work within the law's time constraints, it is not always possible. Interim responses may be made to the requestor indicating the need for SSI Review.
- Requests may be submitted to TSA Field Counsel or to the SSI Program office directly at <u>SSI@tsa.dhs.gov</u>.

SENSITIVE SECURITY INFORMATION TRAINING

Q: If we mark a Record as SSI, does that mean it's always SSI?

- All covered persons are permitted to mark information they believe is SSI, but it is possible it was over-marked.
- The TSA Administrator is authorized to determine whether information pertaining to transportation security constitutes SSI. That authority is delegated from the Administrator to the Chief of the SSI Program.
- Using this authority, the SSI Program office determines what information is designated as SSI or not SSI within a record. The SSI Program office is the final arbiter and authorized to make SSI determinations on both Federal records and records produced by stakeholders.
- If necessary, the SSI Program office will provided redacted versions (i.e., all of the SSI blacked out) for public consumption.

SENSITIVE SECURITY INFORMATION TRAINING

Q: Who Do We Contact for Additional Assistance?

- Additional SSI resources are posted to https://www.tsa.gov/for-industry/sensitive-securityinformation
- Questions may be directed to your TSA Policy, Plans and Engagement (PPE) representative at <u>TSA-</u> <u>Surface@tsa.dhs.gov</u>
- The SSI Program office is also available to answer questions about SSI and receive SSI Review Requests through its SSI Inbox at <u>SSI@tsa.dhs.gov</u>.
