PURPOSE AND GENERAL INFORMATION

Due to the ongoing COVID-19 pandemic and to reduce the spread of the virus, the President issued an Executive Order, Promoting COVID-19 Safety in Domestic and International Travel, on January 21, 2021, requiring masks to be worn in and on airports, on commercial aircraft, and in various modes of surface transportation.¹ On January 27, 2021, the Acting Secretary of Homeland Security determined a national emergency existed² requiring the Transportation Security Administration (TSA) to issue this Security Directive (SD) to implement the Executive Order and enforce the related Order³ issued by the Centers for Disease Control and Prevention (CDC), pursuant to the authority of 49 U.S.C. sections 114, 44902, and 44903. Consistent with these mandates and TSA’s authority, TSA is issuing this SD requiring masks to be worn to mitigate the spread of COVID-19 during air travel. The requirements in this SD must be applied

² Acting Secretary David P. Pekoske, Determination of a National Emergency Requiring Actions to Protect the Safety of Americans Using and Employed by the Transportation System (Jan. 27, 2021), available at https://www.dhs.gov/publication/determination-national-emergency-requiring-actions-protect-safety-americans-using-and (accessed Feb. 22, 2021). The Acting Secretary’s determination directs TSA to take actions consistent with its statutory authorities “to implement the Executive Order to promote safety in and secure the transportation system.” In particular, the determination directs TSA to support “the CDC in the enforcement of any orders or other requirements necessary to protect the transportation system, including passengers and employees, from COVID-19 and to mitigate the spread of COVID-19 through the transportation system.”
³ See Order Under Section 361 of the Public Health Service Act (42 U.S.C. 264) and 42 Code of Federal Regulations (CFR) §§ 70.2, 71.31(B), 71.32(B); Requirement for Persons to Wear Masks While on Conveyances and at Stations, Ports, or Similar Transportation Hubs (January 29, 2021)
to all persons onboard a commercial aircraft operated by a U.S. aircraft operator, including passengers and crewmembers, **including those already vaccinated**. TSA developed these requirements in consultation with the Federal Aviation Administration and CDC.

**DEFINITIONS**

For the purposes of this SD, the following definitions apply:

*Conveyance* has the same definition as under 42 CFR 70.1, meaning “an aircraft, train, road vehicle, vessel...or other means of transport, including military.”

*Mask* means a material covering the nose and mouth of the wearer, excluding face shields.

**ACTIONS REQUIRED**

A. The aircraft operator must provide passengers with prominent and adequate notice of the mask requirements to facilitate awareness and compliance.  

   At a minimum, this notice must inform passengers, at or before check-in and as a pre-flight announcement, of the following:

   1. Federal law requires each person to wear a mask at all times throughout the flight, including during boarding and deplaning.
   2. Refusing to wear a mask is a violation of federal law and may result in denial of boarding, removal from the aircraft, and/or penalties under federal law.
   3. If wearing oxygen masks is needed because of loss of cabin pressure or other event affecting aircraft ventilation, masks should be removed to accommodate oxygen masks.

B. The aircraft operator must not board any person who is not wearing a mask, except as described in Sections D., E., and F.

C. The aircraft operator must ensure that direct employees and authorized representatives wear a mask at all times while on an aircraft or in an airport location under the control of the aircraft operator, except as described in Sections D., E., and F.

D. The requirement to wear a mask does not apply under the following circumstances:

   1. When necessary to temporarily remove the mask for identity verification purposes.

---

4 A properly worn mask completely covers the nose and mouth of the wearer. A mask should be secured to the head, including with ties or ear loops. A mask should fit snugly but comfortably against the side of the face. Masks do not include face shields. Masks can be either manufactured or homemade and should be a solid piece of material without slits, exhalation valves, or punctures. Medical masks and N-95 respirators fulfill the requirements of this SD. CDC guidance for attributes of acceptable masks in the context of this SD is available at [https://www.cdc.gov/quarantine/masks/mask-travel-guidance.html](https://www.cdc.gov/quarantine/masks/mask-travel-guidance.html).

5 Notice may include, if feasible, advance notifications on digital platforms, such as on apps, websites, or email; posted signage in multiple languages with illustrations; printing the requirement on boarding passes; or other methods as appropriate.
2. While eating, drinking, or taking oral medications for brief periods. Prolonged periods of mask removal are not permitted for eating or drinking; the mask must be worn between bites and sips.

3. While communicating with a person who is deaf or hard of hearing, when the ability to see the mouth is essential for communication.

4. If wearing oxygen masks is needed because of loss of cabin pressure or other event affecting aircraft ventilation.

5. If unconscious (for reasons other than sleeping), incapacitated, unable to be awakened, or otherwise unable to remove the mask without assistance, or otherwise unable to remove the mask without assistance.

E. The following conveyances are exempted from this SD:

1. Persons in private conveyances operated solely for personal, non-commercial use.

2. A driver, when operating a commercial motor vehicle as this term is defined in 49 CFR 390.5, if the driver is the sole occupant of the vehicle.

F. This SD exempts the following categories of persons from wearing masks:

1. Children under the age of 2.

2. People with disabilities who cannot wear a mask, or cannot safely wear a mask, because of the disability as defined by the Americans with Disabilities Act (42 U.S.C. 12101 et seq.).

---

6. The CDC has stated that brief periods of close contact without a face mask should not exceed 15 minutes. See https://www.cdc.gov/coronavirus/2019-ncov/php/public-health-recommendations.html

7. Persons who are experiencing difficulty breathing or shortness of breath or are feeling winded may remove the mask temporarily until able to resume normal breathing with the mask. Persons who are vomiting should remove the mask until vomiting ceases. Persons with acute illness may remove the mask if it interferes with necessary medical care such as supplemental oxygen administered via an oxygen mask.

8. Aircraft operators may impose requirements, or conditions of carriage, on persons requesting an exemption from the requirement to wear a mask, including medical consultation by a third party, medical documentation by a licensed medical provider, and/or other information as determined by the aircraft operator, as well as require evidence that the person does not have COVID-19 such as a negative result from a SAR-CoV-2 viral test or documentation of recovery from COVID-19. CDC definitions for SAR-CoV-2 viral test and documentation of recovery are available in Frequently Asked Questions at: https://www.cdc.gov/coronavirus/2019-ncov/travelers/testing-international-air-travelers.html. Aircraft operators may also impose additional protective measures that improve the ability of a person eligible for exemption to maintain social distance (separation from others by 6 feet), such as scheduling travel at less crowded times or on less crowded conveyances, or seating or otherwise situating the individual in a less crowded section of the conveyance or airport. Aircraft operators may further require that persons seeking exemption from the requirement to wear a mask request an accommodation in advance.

9. This is a narrow exception that includes a person with a disability who cannot wear a mask for reasons related to the disability; who, e.g., do not understand how to remove their mask due to cognitive impairment, cannot remove a mask on their own due to dexterity/mobility impairments, or cannot communicate promptly to ask someone else to
3. People for whom wearing a mask would create a risk to workplace health, safety, or job
duty as determined by the relevant workplace safety guidelines or federal regulations.

G. If a passenger refuses to comply with an instruction given by a crew member with respect to
wearing a mask, the aircraft operator must:

1. Make best efforts to disembark the person who refuses to comply as soon as
practicable; and

2. Follow incident reporting procedures in accordance with its TSA-approved standard
security program and provide the following information, if available:
   a. Date and flight number;
   b. Passenger’s full name and contact information;
   c. Passenger’s seat number on the flight;
   d. Name and contact information for any crew members involved in the incident; and
   e. The circumstances related to the refusal to comply.

PREEMPTION

The requirements in this SD do not preempt any State, local, Tribal, or territorial rule, regulation,
order, or standard necessary to eliminate or reduce a local safety hazard, which includes public
health measures that are the same or more protective of public health than those required in this
SD, if that provision is not incompatible with this SD.

ACKNOWLEDGMENT OF RECEIPT

The aircraft operator must immediately provide written confirmation of receipt of this SD to its
Principal Security Inspector (PSI) or International Industry Representative (IIR), as appropriate.

DISSEMINATION REQUIRED

The aircraft operator must immediately pass the information and measures set forth in this SD to
any personnel having responsibilities in implementing the provisions of this directive. The
aircraft operator may share this SD with anyone subject to the provisions of this directive to
include but not limited to: federal, state, and local government personnel; authorized
representatives; catering personnel; vendors; airline club staff; contractors; etc.

remove their mask due to speech impairments or language disorders, or cannot wear a mask because doing so would
impede the function of assistive devises/technology. It is not meant to cover persons for whom mask-wearing may
only be difficult. The CDC issued additional guidance on disability exemptions on March 23, 2021, which is
APPROVAL OF ALTERNATIVE MEASURES

In accordance with 49 CFR 1544.305(d), the aircraft operator must immediately notify its PSI or IIR, as appropriate, if unable to implement any of the measures in this SD, or in any TSA-approved alternative measure. The aircraft operator may submit proposed alternative measures and the basis for submitting those measures to its PSI or IIR.
